## /ARGE

Building digital competence

The ARGE is an association of more than 100 well-known brand manufacturers in the HVAC and sanitary industry. Moreover ARGE is a leading industry B2B service provider in this field. On behalf of the members as well as in coordination with market partners, the ARGE operates the international platform [building-masterdata.com](http://building-masterdata.com). HVAC and sanitary wholesalers as well as installer companies, consultants, architects and contractors can find information, data and other relevant documents to the products here. All data are following uniform standards in verified data quality and are completely free of charge. Furthermore the ARGE is committed to the systematic implementation and dissemination of new digital information and communication technologies.

With kind regards

Product data and documents for building services  
How the platform works

# BUILDING MASTERDATA.com

The first international platform  
for brand-name HVAC products

High-performance 24/7 internet service  
with a comprehensive download area

in accordance with applicable national standards

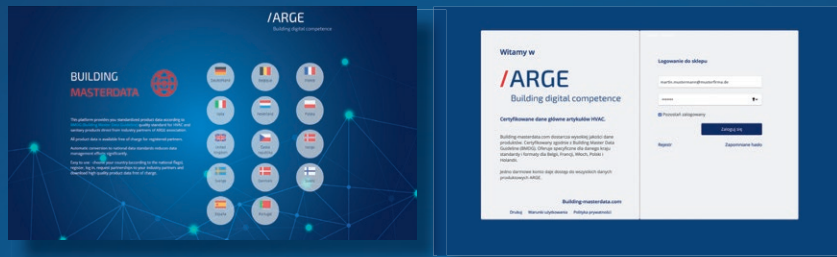

Country-specific formats base on the  
Building Master Data Guideline (BMDG)

Modern and extremely robust IT architecture  
to prevent breakdown and misuse

Free use; further content and services  
will be added step by step

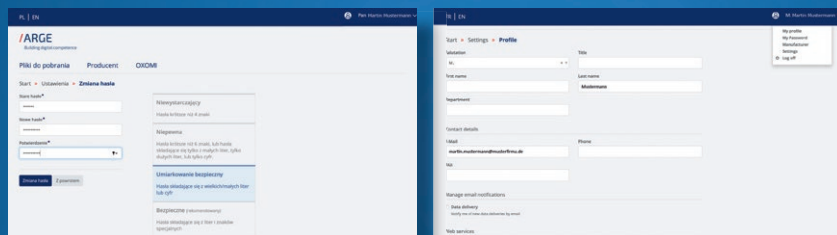

## Getting started

From international offers ...

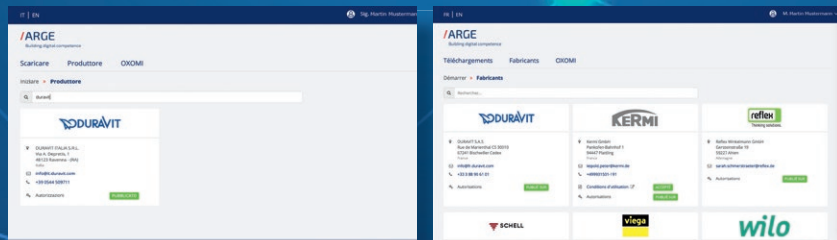

**Easy** | You are new here? Then you have to register first. Select your country according to the flags. Afterwards you can either login with your user name and password or register.

## Registration

**Fast** | Fill out the mandatory fields. You will then receive an email for verification. After logging in please change your password immediately. Click on your name in the top right-hand corner and, if necessary, add your profile etc. in the drop-down menu.

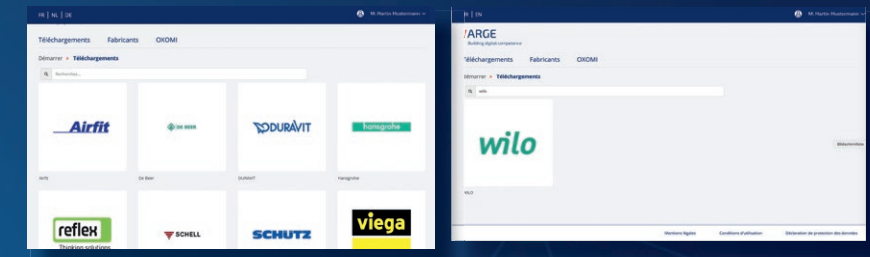

## Manufacturer relationship/application

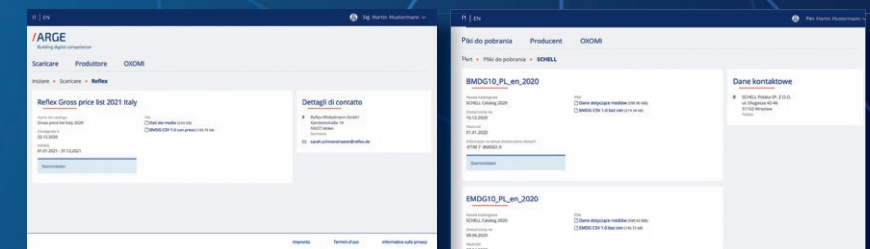

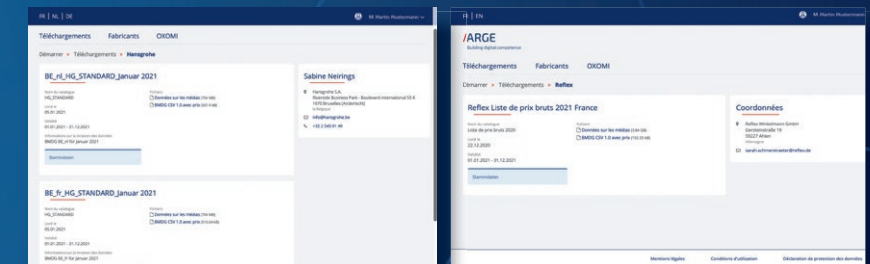

**Individual** | After you have registered, please click on „manufacturer“ to define partnerships by first requesting authorization. The respective company will activate you and gives you access to all important data for your business relationship.

## Product data

... to data records with national standards

**Clear** | Under „Product data“, the data deliveries of ARGE industry members are available for downloading into your system. The manufacturers can also be called up directly via the search function.

**Country-specific** | In addition to the product data, you can find documents, image data and additional information files of the brand assortments you have previously defined. Provision date and validity information lead to a high degree of transparency and planning reliability – and that throughout Europe.
