[Building-masterdata.com](https://building-masterdata.com) is a platform for master data and documents for building services. A lot of brands and companies make their product data available here. So, as a wholesaler, planner or dealer you have 5 good reasons for using it.

- You will find high-quality master data
- You can download image data, documents and product catalogues
- You have country-specific formats (e.g., FAB-DIS, 2ba, or Angaisa)
- You get access to Oxomi PDF documents
- You have a fast and easy download of product data for offers, order processing and calculation
- You can contact the ARGE for personal support
- it is free of charge for customers and easy to use

All data are based on the Building Master Data Guideline, the BMDG, which is an ARGE standard for general master data in Europe. Many well-known brands are already providing data here for various countries and the range grows continuously.

Are you interested?

Join now and register at building-masterdata.com.

Registration is quite simple. Request partnerships from your industry partners and then start your downloads!

You need more information? Watch the [BMD video on YouTube!](#)
