

# BUILDING MASTERDATA

The high quality masterdata portal

This platform provides you standardized product data according to [BMDG \(Building Master Data Guideline\)](#) quality standard for HVAC and sanitary products direct from industry partners of ARGE association.

German customers can find their data according to the German DQR [here](#).

All product data is available free of charge for registered partners.

Automatic conversion to national data standards reduces data management efforts significantly.

Easy to use - choose your country (according to the national flags), register, log in, request partnerships to your industry partners and download high quality product data free of charge.

## 5 GOOD REASONS FOR BUILDING-MASTERDATA

- European master data of many brands under one address
- High quality data
  - Reduction of data management efforts (quality instead of quantity)
- High degree of automation
  - Reduction of bilateral interfaces and conversion
- Country-specific requirements included
- Free of charge for customers and easy to use (modern and safe)

The building master data guideline BMDG is a guideline for general master data in Europe. The BMDG identifies and defines data properties. It contains two sets of features: one common set for all markets as well as one set of country specific characteristics.

high quality product data

## 5 RELEVANT PIECES OF CONTENT

- High quality master data
- Image data and documents
- Product catalogues
- Country specific conversions and formats (FAB-DIS, Angaisa, 2ba)
- Oxomi PDF documents

Good product data is essential for your customers. These data is required in everyday business, e. g. for the preparation of offers, for planning and last but not least for sales.

## 5 STEPS TO USE BUILDING MASTERDATA

- Visit [WWW.BUILDING-MASTERDATA.COM](http://WWW.BUILDING-MASTERDATA.COM)
- Choose your country
- Register with user name and password
- Request partnerships to your industry partners
- Start your downloads

Registration and use of [BUILDING-MASTERDATA.COM](http://BUILDING-MASTERDATA.COM) is quite simple. And what is more: it is free of charge and advertising.

The screenshot shows the login page of the Building Masterdata website. On the left, there is a welcome message in French: 'Bienvenue à /ARGE Building digital competence'. Below this, it states 'Certified HVAC article master data.' and provides a brief description in French: 'Building-masterdata.com offre des données de produits de haute qualité - certifiées selon la Building Master Data Guideline (BMDG). Il propose des formats spécifiques à chaque pays pour la Belgique, la France, l'Italie, la Pologne et les Pays-Bas.' At the bottom of this section are links for 'Imprint', 'Terms of Use', and 'Data privacy statement'. On the right, there is a 'Shop login' section with input fields for 'User name' and 'Password', a 'Stay logged in' checkbox, and a 'Login' button. Below the login fields are links for 'Register' and 'Forgot password'. The website URL 'WWW.BUILDING-MASTERDATA.COM' and the logo 'Building-masterdata.com' are visible at the bottom of the page.

Building digital competence

## Do you know ARGE Building digital competence?

For more than 30 years it is our ambition to support manufacturers in the HVAC and sanitary field with regard to article master data management as well as data standardization. Our services are including preparation, exchange and distribution of data as well as digital processes. This saves your time and money - and you will be ready to provide your customers with high-quality article master data safely and efficiently.

We would like your company to become part of our strong community. Please let us inform you personally and without any obligation referring to the current status of your data. With ARGE Building digital competence, your product data management will be faster and better.
